

## Science Curriculum Overview

At Goldsmith Primary Academy, we teach through the “I” and “We” ASPIRE curriculum. We prioritise the need to personalise the curriculum to meet the needs of our children. Within Science, we place a strong emphasis on key skills and enquiry based learning.

We are working hard to ensure the National Curriculum is carefully mapped to reflect the age and ability of our children, as well as building a progression of key skills to underpin the objectives in each area of the Science Curriculum.

Exciting and practical learning is promoted allowing for each year group to create exciting and engaging learning opportunities that the children have ownership of and a curriculum that allows children to ask questions to further their own understanding.
